Name of the ILMS Software – *SOUL 2.0*

Year of automation – 2010

The total management of library is operated by the SOUL 2.0 software provided by INFLIBNET. The software is very user friendly. In our college library only cataloguing and circulation is done through the software. Barcode system is intact in the software and using barcode scanner circulation can be done quickly. OPAC facility of SOUL software provides sophisticated choices of search options like simple search, Boolean search etc. And different display formats. The Central library also provides this facility to its users. Through the OPAC library users can detect whether a book is available at the library or not. SOUL provides facility to create, view and print records in regional languages.
