

## Best Practice II

### Title of the practice- INSTITUTIONAL RESEARCH PROJECTS

**Objective of the Practice-** As an academic institution, to promote and development of research culture is one of the prime responsibilities. With eight departments in the college, there are teaching staff from different background of studies and discipline and with varied pool of knowledge. Also, to find out any problem relating to the community, the institution takes up research projects to address the gap with an aim to generate fruitful results. To bring them all together, the institution has taken up the unique initiative of undertaking departmental and inter-departmental research projects with self-generated fund of the institution. There is also an active participation of students while undertaking these research projects so as to give them an insight of research work thereby inculcating a positive attitude to solve problems associated with their community or society at large.

The main objectives of the practice are-

1. To provide an environment of research culture amongst the teaching staff as well as students.
2. To promote a cordial academic relationship between the departments through exchange of new ideas and developments.
3. To search for the research problems relating to the community and society at large and put forward suggestions and recommendations to the concerned authority.

**The Practice-** During this period, the eight departments of the college carried out eight departmental research projects in their concerned area of study. There were also four inter-departmental research project which were ongoing in this period. Along with this, there was a mega project to be submitted by Department of English and a Diamond Jubilee research project undertaken by the institution in collaboration with Dept. of Statistics, Dibrugarh University.

For carrying out these projects, the institution appoints the departments and inter-departments to complete the work in a stipulated time. The departments within that time period according to their research design complete the work with the assistance of students. After submission, the projects are forwarded to experts of Dibrugarh University for evaluation and needful suggestions.

**Mega Research Project- Language Proficiency and Prospects of Employment: An Analysis of the English Language Learning Environment in Selected High Schools in Teok (Ongoing)**

**Problems encountered and resources required-**

1. Due to the semester system of academic curriculum in the institution, the teaching staffs as well as the students has time constraints to go for intensive field study of their research project for which the investigators have to select limited area of study.
2. In the context of the problem, if the department is provided with a research assistant specifically for field survey for a limited duration, the said problem could be solved.
3. Due to Covid-19, some of the research projects could not be submitted within stipulated time.
